Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-39,98-101 drawn to encrypting a TV signal using different encryption methods, classified in class 380, subclass 200.
- II. Claims 40-55, drawn to packetizing and assigning packet identifier to the encrypted packets, classified in class 713, subclass 160.
- III. Claims 56-79, drawn to demodulating stream of modulated packets and remapping packet identifier, classified in class 370, subclass 351.
- IV. Claims 80-97, drawn to method of identifying packet type and selecting packets of the identified packet type for multiple partial encryption, classified in class 725, subclass 31.

Inventions of claims 1-101 are related to as subcombinations disclosed as usable together in a single combination. Encrypting TV signals using different encryption methods in claims 1-39,98-101 apart from being used with groups II,III and IV in that it could be implemented in video/audio copy protection. Invention II could be used in field of packet protection in a communication network. Invention of III could be used in field of network security such as remote data access control. Invention IV could be used in field of satellite or cable signal distribution system. Because these inventions are distinct for reasons above and acquired separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. These separate classification is an indication of burden on the examiner as reason stated above.
